

Flexible liquid barrier system

PROTECT YOUR ASSETS

Are you prepared for flood disaster?

Don't leave your preparation until it is too late. Get proactive against disaster now with the world's number one flood protection product and reduce the risk to property, life and income loss. Introducing the Tiger Dam™ System, the world's leading flexible dam solution.

Aus Flood Control was created following the devastation of the Brisbane floods in 2011. Founder, Mark Bowater was compelled into action after he realised the severe lack of disaster protection available. He sought to find a resource that could help reduce the impact of such a disaster in the future. Considerable research led him to the Tiger Dam™ System, the world's leading flexible dam solution for protecting business, property and lives.
